## Editorials

PAGES 2, 257

## Special Articles from the Centenary issue

AUTHOR	TITLE	PAGE
	Greetings	41
Steve Abbott	Editorial	2
Roy Ashley	A century of the <i>Gazette</i>	1
Michael Atiyah	Geometry and Physics	78
A. Baker	Squaring the circle	71
Mary Bradburn	Presidents and presidential addresses	13
Victor Bryant	Patterns within	25
Michael Cornelius	My first <i>Mathematical Gazette</i>	31
Mike Dampier	<i>The Mathematical Gazette</i> : a brief history	5
Jean Dieudonné	Mathematics of our day	45
A. Gardiner	'Problem-solving'? Or problem solving?	143
John Hersee	Curriculum development and the MA	137
Graham Hoare	A survey of mathematical logic, part I: pre-1931	83
Geoffrey Howson	Looking back – and looking forward	129
Bertha Jeffreys	Recollections 1	37
D. V. Lindley	A brief history of Statistics in the last 100 years	92
Robert MacMillan	A hundred years of calculating aids	101

AUTHOR	TITLE	PAGE
William McCrea	Personalities and Presidents	19
Peter M. Neumann	A hundred years of finite group theory	106
A. Robert Pargeter	In praise of geometry	127
Douglas Quadling	A century of textbooks	119
Peter Reynolds	A sister for the <i>Mathematical Gazette</i>	33
Bill Richardson	Producing the <i>Gazette</i>	3
P. Shiu	Progress in Number Theory	54
Alan Tammadge	Recollections 2	39
Bryan Thwaites	Two Conjectures or how to win £1100	35

## Articles

AUTHOR	TITLE	PAGE
R. McNeill Alexander	Walking and running	262
P. K. Aravind	Two families of antiprisms	462
Roy Ashley	The President's Address	450
C. J. Bradley and J. T. Bradley	Countless Simson line configurations	314
M. N. Brearley	A mathematician's view of bowling	501
Peter Cochrane	Virtual mathematics	267
Don Cowell	Searching for digital invariants	519
H. Martyn Cundy	Curves and conjugacy	207
Subhranil De and Abhijit Sen	The generalised Gamow-Stern problem	345
Michael A. B. Deakin	Boole's mathematical blindness	511
Keith Devlin	Mathematical proofs in the computer age	149
Jean Dieudonné	The concept of 'rigorous proof'	204
D. B. Eperson	Lewis Carroll – Mathematician	199
T. J. Fletcher	Take it or leave it!	185
Colin R. Fletcher	Two prime centenaries	476
Martin Gardner	Word ladders – Lewis Carroll's doublets	195
Branko Grünbaum and G. C. Shephard	A new Ceva-type theorem	492
G. T. Q. Hoare	A survey of mathematical logic, part II: post-1931	286
Guy Inchbald	Five space-filling polyhedra	466

# INDEX

v

AUTHOR	TITLE	PAGE
Keith Luoma	What's in a name?	297
Keith Luoma	The truth behind 'famous name' mathematics	349
Robert MacMillan	Getting the right perspective	258
Fernando Mayoral	Semi-magic squares and their orthogonal complements	308
K. Robin McLean	Polynomials with equally spaced zeros	526
R. W. D. Nickalls and R. H. Dye	The geometry of the discriminant of a polynomial	279
Fulvio Pompili	Evolution of finite sequences of integers	322
Tom Roper	The mathematics of bowls	298
W. W. Sawyer	What use are abstract spaces?	167
Ron Shail	Some properties of Brocard points	485
Cedric A. B. Smith	Lagrange's inversion formula and function matrices	532
Ian Stewart	The ultimate in technology transfer	163
Michael Wetherfield	The enhancement of Machin's formula by Todd's process	333
William Wynne Willson	Turtles on skis	176

## Matters for debate

AUTHOR	TITLE	PAGE
Janet Duffin	Making the most of technology: a personal perspective	541
H. Fujita, S. Iitaka, T. Uetake, K. Yokochi	Mathematics education at risk	352
Ken Houston	Assessing A level mathematics	538
Roger Porkess	Perceptions of change	356
Kenneth Ruthven	The technology test: new items for a new era	360
Sally Taverner	Comparing Boards in A level Mathematics	362

## Olympiad Report

## Notes

March	80.1 – 80.14
July	80.15 – 80.37
November	80.38 – 80.61

AUTHOR	NO.	TITLE	PAGE
Steve Abbott	80.2	Averaging sequences and triangles	222
D. V. Anderson	80.49	Iterations for the square root	574
A. F. Beardon	80.6	Square roots of involutions	230
Rod Berrieman	80.53	Combinations with gaps	582
C. J. Bradley	80.34	On solutions of $m^2 + n^2 = 1 + l^2$	404
Richard Bridges	80.61	More centres of mass	596
Frank Chorlton	80.24	Logarithmic integration	381
Tim Cross	80.31	A Fibonacci fluke?	398
Neil Curwen	80.21	The optimal flight bag revisited	375
M. D. Dampier	80.7	When air resistance doesn't matter	234
M. D. Dampier	80.15	$\pi$ is finite!	367
D. B. Eperson	80.12	The Euler line and the Eperson line	239
Russell Euler	80.28	Examples using the maximum modulus theorem	394
Qi Feng	80.22	Inequalities for an integral	376
Harley Flanders	80.1	Averaging sequences again	219
David Fowier	80.23	A simple approach to the factorial function	378
F. Gerrish	80.13	Symmetric bordered determinants	239
Khuloud Ghalieh and Mowaffaq Hajja	80.45	The Fermat point of a spherical triangle	561
P. Glaister	80.8	Golden earrings	224
P. Glaister	80.27	Second order differential equations – a unified approach	392
P. Glaister	80.36	A result for a vessel filling problem	407
Gillian Hatch	80.40	Still more about the (20, 21, 29) triangle	548
Ray Hill, S. M. Elzaidi	80.46	Cubes and inverses of magic squares	565
Keith Hirst	80.25	Newton's method – with mistakes	385
Larry Hoehn	80.38	Pythagoras inside out	544
Graham Jameson	80.29	Counting subsets and the binomial theorem	395
Yohannon John	80.44	Mechanical construction of conics	558
J. Kashangaki	80.3	A test for divisibility by seven	226
Janet E. Kermodé, Mark W. Kermodé and Nigel B. Backhouse	80.26	A Gauss trapezium integration rule	389

AUTHOR	NO.	TITLE	PAGE
Thomas Koshy	80.48	The Euclidean algorithm via matrices and a calculator	570
Josip Kovačević, Darko Veljan	80.41	A triangular analogue of the Pythagorean theorem	550
Günter Kröber	80.51	On non-palindromic patterns in palindromic processes	577
Wilbert H. F. J. Körver	80.14	Matches and coins, an old game with new rules	243
Paul Lescot	80.32	A characterisation of prime numbers	400
G. Leversha, P. Sammut, P. Woodruff	80.60	The shot-putter problem	592
C.-S. Lin	80.18	Heron's formula in 3-dimensional space	370
Nick Lord	80.4	My favourite calculus problem	226
Nick Lord	80.30	Only connect !	396
Nick Lord	80.54	Pictorial integration of $\cos^2 \theta$ and $\sec^2 \theta$	583
Nick Lord	80.55	A 'maths bite': how to impress a chemist	584
Nick MacKinnon	80.11	Which primes are produced by Euclid's proof?	237
K. Robin McLean	80.5	Curves which are alike at all points	229
J. T. S. Mills	80.39	Another family tree of Pythagorean triples	545
R. W. D. Nickalls	80.50	A note on solving cubics	576
A. R. Pargeter	80.9	The addition formula for cosine	235
A. Robert Pargeter	80.35	An example of strong induction	406
Chris Pritchard	80.58	Division of stakes in golf	587
R. J. Reed	80.37	An intransitive example of a Markov chain	411
Bill Richardson	80.59	Is it or isn't it?	589
Sebastián Martín Ruiz	80.52	An algebraic identity leading to Wilson's theorem	579
J. A. Scott	80.10	A fractal curve suggested by the MA crest	236
J. A. Scott	80.16	On $\pi$ and the concept of solid angle	368
J. A. Scott	80.17	On the duality of spherical triangles	369
J. A. Scott	80.20	On the least distance from three fixed points	374
J. A. Scott	80.56	On sequences of regular convex polytopes	584
J. A. Scott	80.57	The Euler constant $\gamma$ without logarithms	585
S. Simons	80.47	An iterative algorithm for matrix inversion which is always convergent	567
D. Talukdar, N. R. Das	80.33	Measuring associativity in a groupoid of natural numbers	401
S. Y. Trimble	80.42	The limiting case of triangles formed by angle bisectors	554
Ian Warburton	80.43	Bride's chair revisited again !	557
David B. Wilson	80.19	Collinear centres of enlargement	372

**Reviews**

AUTHOR	TITLE	REVIEWER	PAGE
David Berlinski	A tour of the calculus	<i>Ad Meskens</i>	624
Jon F. Carlson	Modules and group algebras	<i>Brian H. Denton</i>	636
S. D. Chatterji (ed.)	Proceedings of the International Congress of Mathematicians (ICM), Zurich 1994	<i>Steve Abbott</i>	622
Lawrence Conlon	Differentiable manifolds; a first course	<i>Nick Lord</i>	633
Leo Corry	Modern algebra and the rise of mathematical structures	<i>Steve Abbott</i>	630
David E. Drew	Aptitude revisited: rethinking math and science education for America's next century	<i>Tony Gardiner</i>	443
H. E. Edwards	Advanced calculus: a differential forms approach	<i>Nick Lord</i>	629
Paul Ernest (ed.)	Mathematics, education and philosophy	<i>Tony Gardiner</i>	440
Harry Frank and Steven C. Althoen	Statistics: concepts and applications	<i>Philip V. Bertrand</i>	637
Nathaniel Grossman	The sheer joy of celestial mechanics	<i>J. Abram</i>	638
M. Hazelwinkel (ed.)	Encyclopaedia of Mathematics	<i>Steve Abbott</i>	623
Lars Kadison and Matthias T. Kromann	Projective geometry and modern algebra	<i>Bob Burn</i>	446
John King	John King 1795 arithmetic book	<i>F. Gareth Ashurst</i>	626
Charles T. Le	The most paradoxist mathematician in the world	<i>Tony Gardiner</i>	625
M. S. Mahoney	The mathematical career of Pierre de Fermat 1601-1665 (Second Edition)	<i>Chris Pritchard</i>	628
D. S. Mitrinović and J. D. Kečkić	The Cauchy method of residues, Volume 2	<i>Nick Lord</i>	633
Theodore W. Palmer	Banach algebras and the general theory of $*$ -algebras. Volume 1: Algebras and Banach algebras	<i>Graham R. Allan</i>	635
John Ryan (ed.)	Clifford algebras in analysis and related topics	<i>Steve Abbott</i>	634
Lennart Råde and Bertil Westergren	Mathematics handbook for science and engineering (third edition)	<i>Steve Abbott</i>	444
Steven Schartzman	The words of mathematics	<i>Arthur Dodd</i>	436
Heinz Schumann and David Green	Discovering geometry with a computer	<i>Richard Bridges</i>	434
SMP 11-16	Calculation	<i>Rosalie McCrossan</i>	435
SMP 11-16	Ratio, fractions, decimals and percentages	<i>Rosalie McCrossan</i>	435

AUTHOR	TITLE	REVIEWER	PAGE
SMP 11-16	Estimation, number notation and measurement	<i>Rosalie McCrossan</i>	435
Anita Solow (ed.)	Preparing for a new calculus. Conference proceedings	<i>Francisco B. Rosado</i>	438
Del Washburn	Theomatics II: God's best-kept secret	<i>Steve Abbott</i>	439

# Students' Problems
